SUMMARY

Final-year B.Tech CSE (AI & ML) student who has built and deployed two full-stack projects: a real-time multiplayer quiz platform and an AI-powered feedback analysis platform. Strong foundation in Java, DSA, REST APIs, and machine learning, backed by a GATE 2026 score of 324.

PROJECTS

Sparq – Real-Time Multiplayer Quiz Platform | *React, Node.js, Express, Socket.io, JWT, Groq API, SQLite*
Live Demo | GitHub

- Built a Kahoot-style real-time quiz game using Node.js and Socket.io, where the server handles timers, scoring, and answer checking to prevent cheating.
- Integrated the Groq API (LLM) to generate 4-option trivia questions on any topic, so hosts can create a quiz instantly.
- Implemented host login with JWT and bcrypt password hashing, plus Express REST APIs to save and reuse quizzes, while live gameplay runs separately over Socket.io.
- Stored game data in SQLite (better-sqlite3, WAL mode) and deployed the React frontend on Vercel and the Socket.io server on Render.

Pulse – AI-Powered Customer Intelligence Platform | *React, Node.js, FastAPI, Scikit-learn, Groq API, MySQL*
Live Demo | GitHub

- Built a full-stack customer feedback platform with a React dashboard, a Node.js/Express API, and a separate FastAPI service for machine learning, using MySQL for storage.
- Implemented an NLP pipeline in Scikit-learn (TF-IDF + Logistic Regression) that classifies feedback sentiment and topic and returns a confidence score.
- Integrated the Groq API (Llama 3) to generate on-demand executive summaries of customer feedback trends.
- Added a fallback so the app stays responsive when the ML service is slow or cold-starting: after a short timeout, the backend switches to a simple keyword-based sentiment check.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, SQL
- **Web / Backend:** React, Node.js, Express, FastAPI, REST APIs, Socket.io, WebSockets, JWT, HTML, CSS
- **Databases:** MySQL, SQLite
- **AI/ML & Data:** NLP, Scikit-learn, NumPy, Pandas
- **Tools / Cloud:** Git, GitHub, Vercel, Render

CERTIFICATIONS & ACHIEVEMENTS

- Qualified GATE 2026 (Computer Science) with a score of 324 in the national-level engineering exam.
- Completed full-stack Web Development Bootcamp by Angela Yu on Udemy.

EDUCATION

KIT's College of Engineering (Autonomous), Kolhapur — 2023 – Present
B.Tech in Computer Science and Engineering (AI & ML) — CGPA: 8.09 / 10

G.M.B. Jr. College, Arjuni Morgaon — 2022
HSC (Class XII) — 83.67%

Vidya Vihar Mandir, Lakhandur — 2020
SSC (Class X) — 83.60%
